

LearnPlatform's EdTech Effectiveness Clearinghouse Lite

Identify potential edtech savings, support strategic decisions and reduce district workload.

The **Oklahoma Public School Resource Center** is teaming up with LearnPlatform to support and enhance member districts' edtech management, vetting processes and evaluation. When you sign up for the cohort, your district can:

- Access a centralized OPSRC digital resource library to view teacher feedback, resources, privacy insights and more.
- View your district's own inventory dashboard with aggregated usage data from your teachers and students.
- Understand which tools are (or aren't) being used, and by whom.
- Identify potential cost savings.
- Inform vetting and student data privacy decisions.

All services and subscriptions are allowed and encouraged under Title I, IV, and ESSER/ARP funding.

For more information and to join the OPSRC cohort, contact Jason Midkiff at jason.midkiff@opsrc.net or by calling (580) 276-8191.

About LearnPlatform

LearnPlatform is an edtech effectiveness system used by local and state education agencies to support evidence-based evaluation and efficient management of their digital ecosystems and improve the security, equity and effectiveness of their education technology, and by edtech providers to build their evidence-base.
