

EPA AIMS TO USE ESPORTS TO HELP STUDENTS BECOME BETTER PLAYERS, PEOPLE, AND PROFESSIONALS

Esports Performance Academy (EPA) is the premier organization that focuses on the holistic growth of esports talent. We have partnered with academic institutions, private organizations, and cities across the country to provide comprehensive support and structure to esports programs.

Our expertise is in working with individuals, teams, high schools, and universities to bridge the gap to professional and collegiate play. We provide vital training to the program's staff, assistance with administrative needs, and immerse players in a high-performance environment. Esports programs and their players are raised to a new standard of performance, all while learning valuable life skills and opening future career opportunities.

WHAT MAKES US DIFFERENT?

We represent an all-star team of coaches, players, and partners seeking to foster excellence in esports.

UTILIZATION OF THE BEST MINDS IN THE INDUSTRY.

TOP-TIER FITNESS AND WELLNESS REGIMENS.

PROVEN PRACTICE INFRASTRUCTURE.

"Working with the Esports Performance Academy for the past few years has been extremely beneficial for not only our students but our program as a whole. When they come in to work with our teams, they do an amazing job of not only helping to improve the technical aspects of my players' performance, but also helping them interpersonally to become better teammates and people through use of communication, critical thinking, and collaboration. There has been a noted increase in the performance and teamwork of the teams they have worked with and we look forward to continue working with them in the future as well."

- Eugene Frier, Director of Esports,
Texas Wesleyan University

"You can tell that the students really listen to their insight and take it to heart. The feedback that they are providing is actually helping students improve, not only in game, but also in terms of their academics and physical fitness. We are very, very pleased with the results of this collaboration and appreciate the fact that they have provided such a tremendous amount of support and direction. It is customized to our students and our districts and, you really cannot find that level of detail and specialization."

- Dr. Leslie Bender Jutzi,
Chief Academic Innovation Officer,
Burleson ISD

"[EPA] provided me with an environment and infrastructure that closely emulated that of a franchised team, which directly allowed me to take my gameplay and mentality to the next level. The staff taught me skills that translate into all aspects of life, provided resources to train in mindfulness, and cultivated an atmosphere of accountability and professionalism."

- Seungmin "Strompest" Lee,
Professional Mid Laner, League of Legends
