

10 SIMPLE STEPS TO START

Change is hard. We get that. People are just naturally resistant to switching things up and implementing new processes. That's why the questions we're asked most frequently about our online delivery of related services in schools have to do with how much time and effort it will take to start using TalkPath Live's singular brand of affordable, flexible, convenient, and effective teletherapy. How hard is it? It's **this** easy!

1 DEMO

School/district decision-makers participate in a brief demo conducted via videoconference with TPL, concluding with a Q&A session.

6 BILLING

If Medicaid billing is required within the school's system, training is provided to TPL; otherwise, standard monthly invoicing applies.

6

2 CONTRACT

TPL submits funding agreement to school client for review or district provides a master contract for TPL review. Contract is executed.

7 TECH CHECK

TalkPath Live conducts a thorough check of all devices to be used, including audiovisual quality, platform access, and connection speed.

7

3 SERVICES

School selects which service options are needed and at what volume. Service types and hours can always be adjusted later.

8 START DATE

School client determines the date upon which the selected services will commence for each school and/or student.

8

4 INFO

Profile information is compiled for each participating student: full name, date of birth, grade level, etc.

9 SUPPORT

School eHelpers are designated and training is provided by TPL to any and all school personnel who wish to receive it.

9

5 IEP DOCUMENTATION

Form of IEP note-taking is chosen: the school's IEP system or TPL's portal—both work equally well and allow anytime access to session notes.

10 SCHEDULE

Therapist assignments are made, caseloads are verified, and scheduling of student sessions is put in place.
